CHAPTER 1

INTRO

General Information

Text

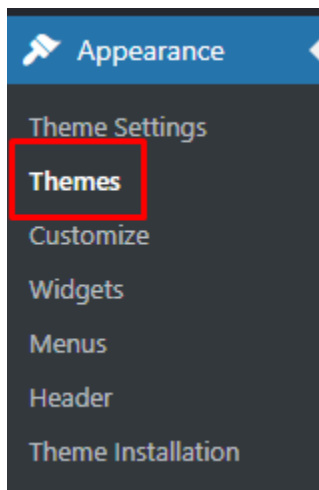

Requirements

Support

Installation

Installation via Administration Panel

If Siver files are downloaded from your Themeforest account, you can start an installation using WordPress administration panel. Once you've logged in to your administration panel go to Appearance > Themes. Depending on your version of WordPress, you'll see Add New or two other tabs: Manage Themes and Install Themes.

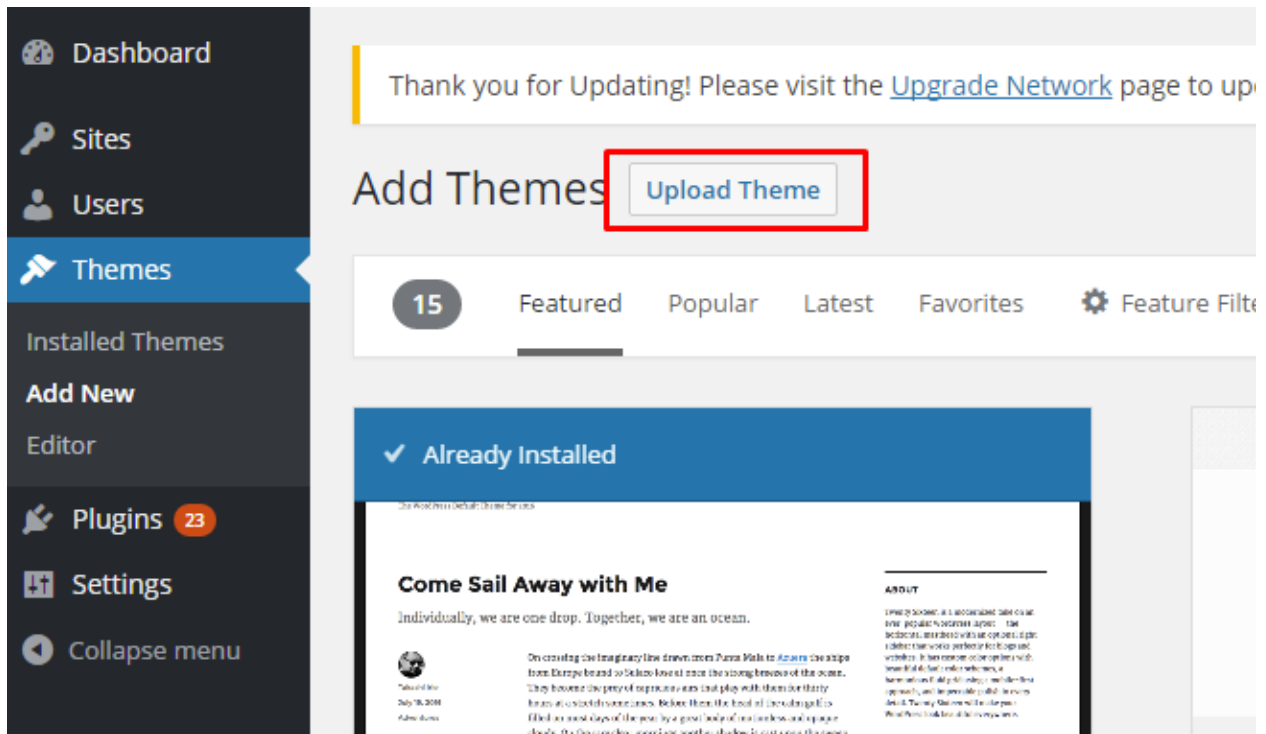

Follow steps below to install the theme:

- **Step 1** - Click on Add New

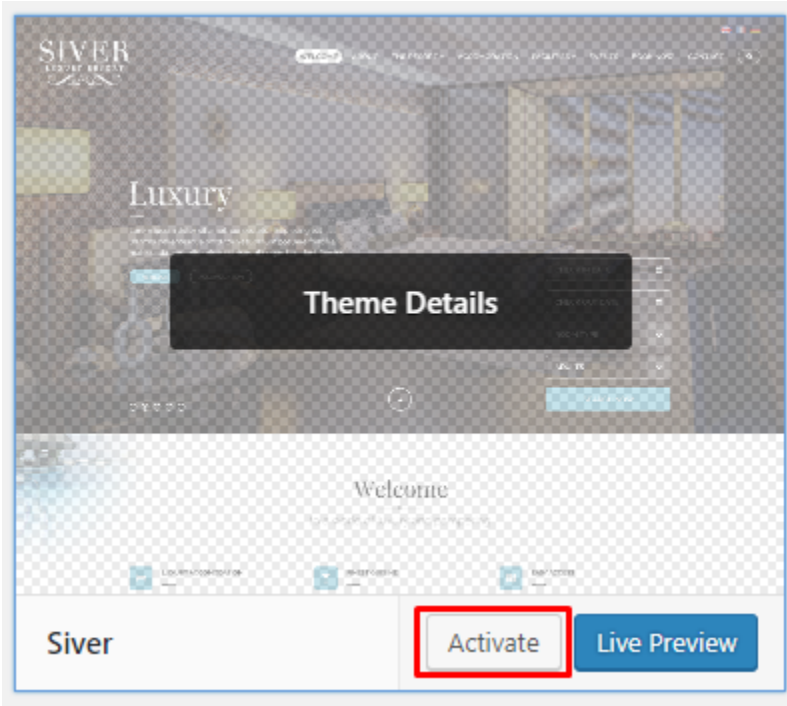

- **Step 2** – Choose Upload Theme option to upload .zip file

- **Step 3** - Choose sivertheme.zip from you computer.
- **Step 4** – Once file is chosen click Install Now

- **Step 5** - Go to Appearance > Themes and Activate Siver WP theme

- **Step 6** - After activating Siver WP you will be send to Theme installation instruction steps. By following this steps you will be able to activate required plugins, activate them and import demo content.

Theme installation instructions

Please follow these steps:

If there is a folder `real-estate-listing-realtyna-wpl` in your `/wp-content/plugins/` directory, please remove it prior to installation

1. Install all required plugins, click here: [install plugins](#)
2. Activate all required plugins, click here: [activate plugins](#)
3. Import demo content, click here: (click only when Estato Plugin plugin is active)
4. (Optional) Click 'Add sample properties' in WPL settings, click here: (click only when WPL plugin is active)

Done!

Common Install Error: Are You Sure You Want To Do This?

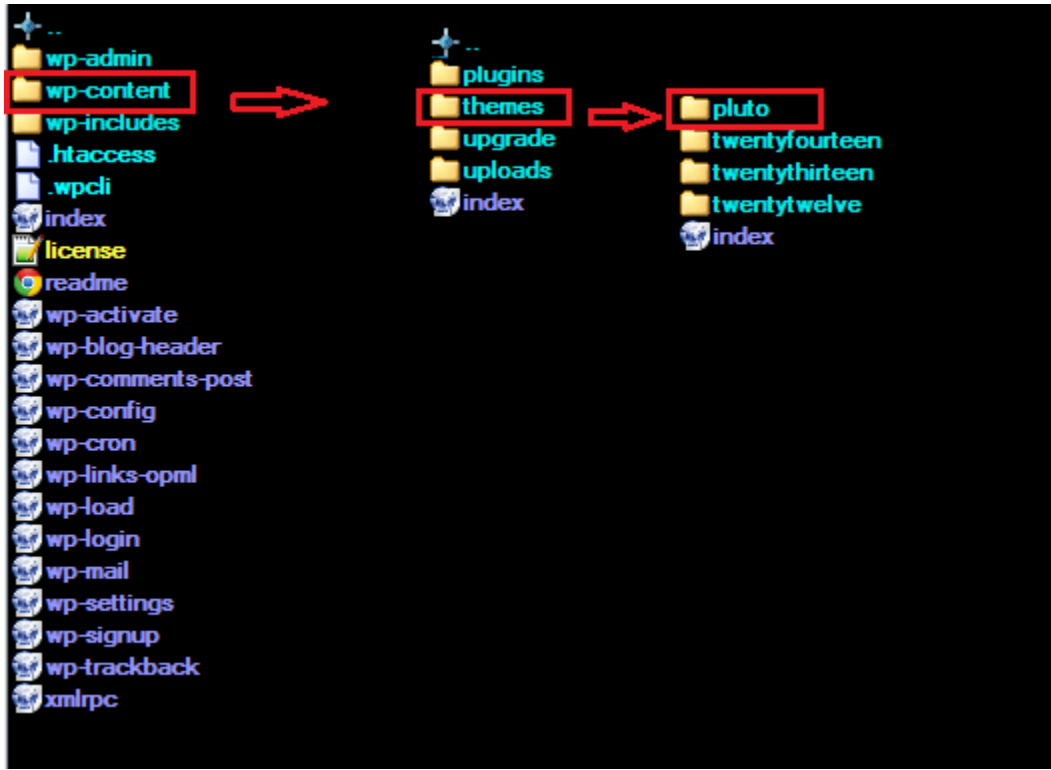

If you get the following question message when installing Estato.zip file via WordPress, it means that you have an upload file size limit. Install the theme via FTP or call your hosting company and ask them to increase the limit.

Installation via FTP

To install Siver WP via FTP, follow steps below:

- **Step 1** – Unarchive `sivertheme.zip` file
- **Step 2** – Access your host web server using FTP client

- **Step 3** – Find directory `wp-content > themes`
- **Step 4** – Put folder `Estate` in directory `wp-content > themes`

Unyson, Plugging and Extensions

Demo content

The fastest and easiest way to import our demo content is to use Theme Options 1-click Demo Importer. It will import all pages and posts, several sample sliders, widgets, theme options, assigned pages, and more. We recommend this approach on a newly installed WordPress. It will *replace* the content you currently have on your website. However, we create a backup of your current content in (Tools > Backup). You can restore the backup from there at any time in the future.

To import our demo content, please follow the steps below:

- **Step 1** – install and activate plugins listed in Theme installation instructions message
- **Step 2** – in dashboard go to Unyson and make sure that Backup & Demo Content extension is activate
- **Step 3** – navigate to Tools where after activating the Unyson extension Demo content Install option will be available
- **Step 4** – choose import option you want to use from available options
- **Step 5** – wait until the content will be installed

Importing can take a few minutes. Please be patient and wait for it to complete. Once it will be loading, you will see message with indicating progress.

Header

How to change logo?

text

How to change header socials and widgets?

How to setup navigation menu?

How to enable Wishlist?

Footer

Contact Form 7 - contact form and Newsletter form

Contact forms in Siver are created with the use of [Contact Form 7](#) Plugin. Below you will find information how to recreate each Contact forms used in our theme by adding the correct markup for the Form section of this plugin.

Send us a Message

Copy this shortcode and paste it into your post, page, or text widget content:

```
[contact-form-7 id="330" title="Send us a Message"]
```

FormMailMessagesAdditional Settings

Form
